

THE SERGEANT BLUFF

HORIZON

UNDERSTANDING YOUR ELECTRICAL USAGE

CALENDAR

- May 2 – Planning & Zoning Meeting @ 6:00 PM
- May 3 – Senior Committee Meeting @ 3:30 PM
- May 3 – Mayor's Committee Meeting @ 5:30 PM
- May 9 – Council Meeting @ 5:30 PM
- May 17 – Parks & Rec @ 5:30 pm
- May 20 – Utility Bill Due Date
- May 23 – Council Meeting @ 5:30 PM
- May 30 – Community Action Team @ 12:00 PM
- May 4, 18 – Recycle Days

FARMERS MARKET

The New Sergeant Bluff Farmer's Market will kick off on May 4th at the Community Center parking area with plants just in time for Mother's Day. Additional vendors will be added throughout the season.

More details regarding the time and future dates will be announced on our website at www.cityofsergeantbluff.com and our Facebook page.

SUMMER ADVENTURE CAMP

PROGRAM INFORMATION:

- June 5, 2017 – July 14, 2017
- \$80.00/child and \$100.00 after May 22
- Mondays, Wednesdays & Fridays
- Camp Hours: 9:00am – 12:00pm
- Early Drop Off (optional) 7:30am – 8:45am - \$20.00 per child for this option
- Grades allowed to participate are Kindergarten – 5th Grade of the 2016-2017 School Year
- Questions contact Brent Brown at 712-943-5800 or brent@cityofsergeantbluff.com

SERGEANT BLUFF COMMUNITY NIGHT

The City is sponsoring a Community Night at Lewis and Clark Park to view the Sioux City Explorers play a game on June 8th. Tickets will be sold online only at: <http://tinyurl.com/mv7f6a4> or visit our website for a direct link.

Sergeant Bluff Smiles, located at 104 Port Neal Rd, is a proud sponsor of the City of Sergeant Bluff's Welcome Packet for new residents.

SERGEANT BLUFF
SMILES

POOL HOURS/OPENING

The pool located at 910 Topaz Drive will open on May 27th. Coupon book passes are available to purchase at City Hall or the pool. The pool is available for rent and swimming lessons are being offered. We will begin taking swimming lesson registrations on May 15th. Please call 712-943-5800 or 712-943-7665 for additional information.

DAY	HOURS	ALL AGES
Monday - Friday	12:00 pm – 5:00 pm	\$4.00
Monday - Friday	6:00 pm – 8:00 pm	\$2.50
Saturday	12:00 pm – 7:00 pm	\$4.00
Sunday	12:00 pm – 6:00 pm	\$4.00

2016 WATER QUALITY REPORT FOR SERGEANT BLUFF WATER SUPPLY

This report contains important information regarding the water quality in our water system. The source of our water is groundwater. Our water quality testing shows the following results:

CONTAMINANT	MCL - (MCLG)	Compliance		Date	Violation Yes/No	Source
		Type	Value & (Range)			
Total Trihalomethanes (ppb) [TTHM]	80 (N/A)	LRAA	23.00 (23 - 23)	09/30/2016	No	By-products of drinking water chlorination
Lead (ppb)	AL=15 (0)	90th	6.00 (ND - 10)	2015	No	Corrosion of household plumbing systems; erosion of natural deposits
Copper (ppm)	AL=1.3 (1.3)	90th	0.58 (0.02 - 0.71)	2015	No	Corrosion of household plumbing systems; Erosion of natural deposits; Leaching from wood preservatives
950 - DISTRIBUTION SYSTEM						
Chlorine (ppm)	MRDL=4.0 (MRDLG=4.0)	RAA	1.6 (0.84 - 2.21)	09/30/2016	No	Water additive used to control microbes
05 - WELLS 6, 7, 8, OR 9 @ FINISHED WATER TAP						
Gross Alpha, Inc (pCi/L)	15 (0)	SGL	1.8	07/14/2015	No	Erosion of natural deposits
Barium (ppm)	2 (2)	SGL	0.08	10/14/2014	No	Discharge of drilling wastes; Discharge from metal refineries; Erosion of natural deposits
Fluoride (ppm)	4 (4)	SGL	0.4	10/14/2014	No	Water additive which promotes strong teeth; Erosion of natural deposits; Discharge from fertilizer and aluminum factories
Sodium (ppm)	N/A (N/A)	SGL	25	10/14/2014	No	Erosion of natural deposits; Added to water during treatment process

Note: Contaminants with dates indicate results from the most recent testing done in accordance with regulations.

DEFINITIONS

- Maximum Contaminant Level (MCL) – The highest level of a contaminant that is allowed in drinking water. MCLs are set close to the MCLGs as feasible using the best available treatment technology.
- Maximum Contaminant Level Goal (MCLG) – The level of a contaminant in drinking water below which there is no known or expected risk to health. MCLGs allow for a margin of safety.
- ppb – parts per billion.
- ppm – parts per million.
- pCi/L – picocuries per liter
- N/A – Not applicable
- ND – Not detected
- RAA – Running Annual Average
- Treatment Technique (TT) – A required process intended to reduce the level of a contaminant in drinking water.
- Action Level (AL) – The concentration of a contaminant which, if exceeded, triggers treatment or other requirements which a water system must follow.
- Maximum Residual Disinfectant Level Goal (MRDLG) – The level of a drinking water disinfectant below which there is no known or expected risk to health. MRDLGs do not reflect the benefits of the use of disinfectants to control microbial contaminants.
- Maximum Residual Disinfectant Level (MRDL) – The highest level of a disinfectant allowed in drinking water. There is convincing evidence that addition of a disinfectant is necessary for control of microbial contaminants.

- SGL – Single Sample Result
- RTCR – Revised Total Coliform Rule
- NTU – Nephelometric Turbidity Units

GENERAL INFORMATION

Drinking water, including bottled water, may reasonably be expected to contain at least small amounts of some contaminants. The presence of contaminants does not necessarily indicate that water posed a health risk. More information about contaminants or potential health effects can be obtained by calling the Environmental Protection Agency's Safe Drinking Water Hotline (800-426-4791).

Some people may be more vulnerable to contaminants in drinking water than the general population. Immune-compromised persons such as persons with cancer undergoing chemotherapy, persons who have undergone organ transplants, people with HIV/AIDS or other immune system disorders, some elderly, and infants can be particularly at risk from infections. These people should seek advice about drinking water from their health care providers. EPA/CDC guidelines on appropriate means to lessen the risk of infection by *Cryptosporidium* and other microbial contaminants are available from the Safe Drinking Water Hotline (800-426-4791).

If present, elevated levels of lead can cause serious health problems, especially for pregnant women and young children. Lead in drinking water is primarily from materials and components associated with service lines and home plumbing. SERGEANT BLUFF WATER SUPPLY is responsible for providing high quality drinking water, but cannot control the variety of materials used in plumbing components. When your water has been sitting for several hours, you can minimize the potential for lead exposure by flushing your tap for 30 seconds to 2 minutes before using water for drinking or cooking. If you are concerned about lead in your water, you may wish to have your water tested. Information on lead in drinking water, testing methods and steps you can take to minimize exposure is available from the Safe Drinking Water Hotline or at <http://www.epa.gov/safewater/lead>.

SOURCE WATER ASSESSMENT INFORMATION

This water supply obtains its water from the sand and gravel and sandstone of the Alluvial-Dakota aquifer. The Alluvial-Dakota aquifer was determined to be highly susceptible to contamination because the characteristics of the aquifer and overlying materials provide little protection from contamination at the land surface. The Alluvial-Dakota wells will be highly susceptible to surface contaminants such as leaking underground storage tanks, contaminant spills, and excess fertilizer application. A detailed evaluation of your source water was completed by the Iowa Department of Natural Resources, and is available from the Water Operator at 712-203-0216.

CONTACT INFORMATION

For questions regarding this information or how you can get involved in decisions regarding the water system, please contact SERGEANT BLUFF WATER SUPPLY at 712-203-0216.
